

Blue Wolf Solutions - Intent Intelligence & Customer Acquisition Engine

Vision

Blue Wolf Solutions is building an AI-powered Customer Acquisition Platform.

The goal is not to sell scraped leads.

The goal is to identify demand, capture demand, qualify demand, and convert demand into appointments or customers.

The platform should be modular, allowing different industries and use cases while sharing the same underlying architecture.

Primary industries:

- MedSpas
- Law Firms
- Home Services (HVAC, Plumbing, Roofing, Pest Control)
- Marketing Agencies
- Other local service businesses

Core Philosophy

Most lead generation systems do:

Keyword → Lead List

Blue Wolf should do:

Demand Signal → Intent Analysis → Qualification → Conversion

The value is not in collecting data.

The value is identifying:

- Who is most likely to buy
- What they are interested in
- What stage of the buying process they are in
- What action should happen next

High-Level Architecture

Frontend UI

AI Chat Assistant

Router Workflow (n8n)

Specialized Workflows

Database

Reporting Dashboard

AI Follow-Up / Appointment Setting

Frontend UX

Single dashboard.

User should not see multiple workflows.

User sees:

Chat Input

Examples:

"Find MedSpas in Murrieta that need AI appointment setting."

"Find local CoolSculpting demand."

"Generate a funnel for Botox leads."

"Find law firms with weak SEO."

Consumer Intent

Both

Router Workflow

This is the master workflow.

All requests enter through a single webhook.

Example:

POST /api/router

Request:

```
{  
"query": "Find MedSpas in Murrieta interested in CoolSculpting demand"  
}
```

Router AI determines:

```
{  
"intent": "combined_search",  
"industry": "MedSpa",  
"location": "Murrieta",  
"service": "CoolSculpting",  
"workflows": [  
"business_prospect_finder",  
"consumer_intent_finder",  
"asset_generator"  
]  
}
```

Router executes the proper workflows.

Workflow 1: Business Prospect Finder

Purpose:

Find businesses Blue Wolf can sell services to.

Data Sources:

- Google Maps
- Apify Google Places
- LinkedIn
- Apollo
- Yelp
- Business directories

Inputs:

Industry

Location

Lead Count

Outputs:

Business Name

Website

Email

Phone

Review Count

Rating

Address

Website URL

Opportunity Score

Weaknesses

Recommended Offer

Suggested Pitch

AI Scoring Layer

Analyze:

- Website quality
- Review volume
- Review rating
- Online booking availability
- Chatbot presence
- Lead capture forms
- Mobile optimization
- SEO basics

Return:

```
{  
  "opportunity_score": 92,  
  "weaknesses": [  

```

```
"No online booking",  
"No chatbot",  
"Weak CTA"  
],  
"recommended_offer": "AI Appointment Setter",  
"pitch_angle": "Increase booked consultations without additional staff"  
}
```

Workflow 2: Consumer Intent Finder

Purpose:

Find demand signals.

NOT direct leads.

Data Sources:

- Reddit
- Yelp Reviews
- Yelp Questions
- Google Reviews
- Forums
- Social Comments
- Public Discussions

Examples:

"How much does Botox cost?"

"Best MedSpa near Murrieta?"

"CoolSculpting worth it?"

"Who offers semaglutide?"

Intent Classification

High Intent

"Looking for Botox provider."

"Need CoolSculpting consultation."

Intent Score:

80-100

Medium Intent

"Thinking about getting fillers."

Intent Score:

50-79

Low Intent

"Interesting article about Botox."

Intent Score:

0-49

Buying Stage Classification

Research

Comparison

Vendor Selection

Ready To Buy

Examples:

Research:

"What is Botox?"

Comparison:

"Botox vs Dysport?"

Vendor Selection:

"Best Botox provider in Murrieta?"

Ready To Buy:

"Who has appointments available this week?"

Output Structure

```
{  
  "service": "Botox",  
  "intent_score": 94,  
  "buying_stage": "Vendor Selection",  
  "question": "Best Botox provider in Murrieta?",  
  "location": "Murrieta",  
  "urgency": "High"  
}
```

Workflow 3: Funnel Asset Generator

Purpose:

Convert demand signals into marketing assets.

Input:

Intent Signal

Example:

"How much does CoolSculpting cost?"

Generate:

Landing Page Title

FAQ Section

CTA

AI Setter Script

Email Sequence

Video Script

Blog Outline

Social Posts

Schema Markup Suggestions

Example Output

Landing Page:

"How Much Does CoolSculpting Cost in Murrieta?"

CTA:

"Check if you're a candidate."

AI Script:

"Are you looking to target stomach, arms, thighs, or under-chin fat?"

Workflow 4: AI Appointment Setter

Purpose:

Convert opted-in prospects.

Lead Sources:

Landing Pages

Quizzes

Calculators

Contact Forms

Instead:

Find Demand

Capture Demand

Qualify Demand

Convert Demand

Report Demand

Initial Target Market

Phase 1

Marketing Agencies

Reason:

They immediately understand:

- SEO
- Intent Data
- Content Strategy
- Reporting

Lower education required.

Phase 2

MedSpas

Focus Services:

- Botox
 - Fillers
 - CoolSculpting
 - Weight Loss
 - Skin Tightening
-

Phase 3

Law Firms

- Personal Injury
- Family Law

- Criminal Defense
-

Phase 4

Home Services

- HVAC
 - Plumbing
 - Roofing
 - Pest Control
-

Demo Video Structure

Scenario:

Find MedSpa Opportunities in Murrieta

User enters:

Industry: MedSpa

Location: Murrieta

Service: CoolSculpting

Results:

15 MedSpas Found

32 Local Demand Signals

7 High Intent Questions

3 Landing Pages Generated

AI Appointment Script Generated

Outreach Email Draft Generated

Call-To-Action:

"One Request. Multiple Engines. One Revenue Plan."

Long-Term Goal

Build a platform that combines:

Lead Discovery

Intent Discovery

AI Qualification

Appointment Booking

Reporting

Content Creation

Agency Automation

Into one unified Customer Acquisition Operating System.
